

REACH Regulations

European regulation No1907/2006 "REACH" (Registration, Evaluation and Authorisation of Chemicals) came into force on 1st June 2007. It is aimed to regulate the use of chemical substances within the European Union, especially those Substances of Very High Concern (SVHC's).

Campbell Collins are very well aware that REACH came into force and also the projected timetable to comply with the resulting obligations.

We are committed to meeting our legal obligations under REACH, as a distributor and importer of articles.

In order to comply with the REACH regulation, Campbell Collins have put into place processes and procedures to ensure implementation and compliance with the Regulation especially the assessment of the presence of SVHC's and communication along the supply chain to both suppliers and customers. We are surveying our suppliers for content of substances of very high concern (SVHC) in articles and we will be posting links to available certificates or other statements about REACH on each manufacturers website in due course.

Our findings to date, May 2009, are that all articles distributed by Campbell Collins Limited do not exceed the scope of our duty for registration or notification under the REACH regulations.

Jan Campbell

Managing Director

NB

A small number of hermetic products from MS Kennedy include Beryllium Oxide BeO (CAS Number 1304-56-9), these may be power amplifiers and high powered regulators. The BeO content is below 0.1% Wt % but in the spirit of the intent of the regulations we feel obliged to inform our customers of its potential presence. Customers should not open or crush packages containing BeO substrates and un-required product should be returned to us for safe disposal by the manufacturer.

Please call us if you need to know if the product you use or intend to use contains any BeO.

Some of the MS Kennedy products that do contain BeO:

MSK5211-MSK514
MSK5232 Series
MSK5332 Series
MSK5901RH thru MSK5909RH
MSK5911RH thru MSK5919RH
