

Batch Traceability

Campbell Collins Limited holds Certificate No: RS 36215 and operates a Quality Management System which complies with the requirements of ISO 9001:2008 for the following scope:

‘Stockholding and supply of electronic components, sub assemblies and units from quality assured sources’.

The products we supply to our customers are produced by proven quality assured manufacturers and are fully lot/batch traceable to point and date of manufacture.

We have a specialised stock control system in place that maintains total batch traceability by linking batch identity numbers to despatch documentation and customer orders.

Also our quality processes ensure that every delivery is traceable right back to the point and date of manufacture.

Ian Campbell

Managing Director
